Summary

My passion is web development and web applications design and I have taught myself every aspect of it. I'm an autodidact and a fast learner.
I've learned web development and Front-End fundamentals and I have a vast experience in HTML, CSS, and JavaScript. I also have good knowledge of React.js, the MERN Stack, and Vue.js.
On the graphic side, I have years of experience in Adobe Photoshop.
I'm a team player and capable of working alone.

Projects

"Crwn-Clothing" - While building it I've learn many advanced React topics such as routing, Redux for state management, fetching data with Axios, as well as how to use Stripe for card transactions. On top of that, I've learned how to use Firebase's authentication and real time database, how to use Local Storage to save a current state and how to build a full functional server built with Node.js with API requests for data fetching from the database using RESFull routes and CRUD Pattern.
Technologies: React.js, SCSS, Redux, Node.js, Express, Firebase, Stripe API, Axios.

"Natuors" – This is my first All SCSS, HTML project. In this project I've learn how to use SCSS, how to make CSS animations, how to mimic JS functionality with only SCSS and HTML. I've also learned how to use BEM naming convention.
Technologies: HTML, SCSS.
